PROFILE

An inquisitive and driven senior software engineer with 6 years of experience designing and executing on software projects. Specializing in web development.

WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER | Cypress.io
June 2022 - Present

A startup that offers an open-source automated test runner, as well as a suite of cloud features for gleaning insights about test and application quality

- Maintain and build features for a browser-based test runner packaged with Electron
- Support feature development for a React-based cloud application
- Field and respond to bugs and feature requests from the open-source community on Github
- Optimize CI processes for building and publishing NPM packages and related assets
- Gave a demonstration to thousands of Cypress users on component testing test-driven development philosophy

SENIOR SOFTWARE ENGINEER | Contrast Security
Nov 2018 - May 2022

An application security startup that offers a suite of dynamic and static tools for securing web applications

- Maintained and built features for a dashboard application that received millions of requests per hour, communicating with cross-functional teams regarding product goals and design
- Functioned as Scrum Master for a development team with 5 engineers

SOFTWARE ENGINEER | Mindgrub Technologies
Jan 2017 - Nov 2018

A technology consulting firm that designs, ships, and maintains web and mobile solutions for a variety of different clients
